FREQUENTLY ASKED QUESTIONS

HOW DO I CHOOSE THE CORRECT FLAME-RESISTANT GARMENTS?

Garments are specified based on the employer's evaluation of workplace hazards. Protective garments, which function as wearing apparel for normal work activities, must be comfortable and durable while achieving appearance that is acceptable to both the employer and the wearer. In addition to these general considerations, there may be other hazards present such as chemical or molten substance exposure. Finally, these multi-use garments must be able to withstand laundering to remove soils and flammable contaminants and be returned to service without excessive color loss, fuzzing/pilling (surface appearance change) or excessive shrinkage.

WHAT IS THE EMPLOYER'S RESPONSIBILITY?

Under paragraph 5a1, the General Duty clause of the federal OSHA Act, it is the employer's responsibility to identify risks and hazards in the workplace and seek out appropriate protective garments and equipment for the protection of workers. In making this hazard assessment, the employer must consider the risks present and the most appropriate means of addressing those risks. Where ignition risks are present, flame-resistant protective apparel can become a prudent part of an action plan to address these concerns.

STAINED or SOILED GARMENT

If your flame-resistant garment becomes stained or soiled, and you cannot confirm that the contaminants have been completely removed from the garment, please be aware that the garment may be compromised.

GARMENT REPAIR and MAINTENANCE

For information regarding the repair and maintenance of flame-resistant fabrics, please see ASTM Standard F 1449 (Industrial Laundering of Flame, Thermal and Arc Resistant Clothing) and ASTM F 2757 (Guide for Home Laundering Care and Maintenance of Flame, Thermal and Arc Resistant Clothing). When making repairs to the garment, you must use materials equivalent to the original materials. If trim items such as zippers or labels need repair, they must also be repaired with materials equivalent to the original materials.

GARMENT LIFE

When laundered by recommended procedures, durable flame-resistant fabrics are guaranteed to be flame-resistant for the useful life of the garment. Garment life will vary depending on wear and laundering conditions.

PROCESSING / CLEANING

FR garments can be home laundered – follow care instructions.

Flame resistant garments can be washed with other garments but it is recommended that you sort and wash them separately to prevent contamination with other possibly flammable fibers.

It is recommended that you turn your garment inside out.

You can use your household laundry detergent but be sure it does NOT contain fabric softener or bleach. Fabric softener can coat the fabric making it no longer flame resistant. Fabric softener can also act as fuel in the event of a fire. Bleach and Hydrogen Peroxide should NEVER be used because they can break down the Flame Resistant treatment on your fabric.

Also, **NEVER** starch your garments. Starch is a propellant and propellants are almost always flammable.

“Soft” water (less than 7 grains per gallon of hardness) is required for home laundering flame resistant garments. “Hard” water can leave residue on garments that mask flame resistance.

If needed, steam or dry iron garments at the temperature indicated on care label.

Dry cleaning is optional but not recommended unless necessary to remove stains. Confirm that no starch is used in the process.

NOTES

DO NOT USE DEET on Flame Resistant Clothing.

To learn more about FR clothing appropriate for your line of work, visit [OSHA.gov](https://www.osha.gov).

FR Standards Overview

UNITED STATES CLASSIFICATIONS

ANSI/ISEA 107 ansi.org

American National Standard on performance, classification, and selection of high-visibility safety apparel (HVSA).

ANSI/ISEA 107 sets forth requirements for high-visibility garments to help ensure workers in a range of industries are easily seen during the day, at night, and in low lighting. Additionally, this standard guides workers in choosing the appropriate personal protection equipment (PPE) for their specific work environments and activities, requiring that garments be classified as type O (off-road), type R (roadway and temporary traffic control), or type P (public safety activities). If not FR, the garment is clearly labeled with "This garment is not flame-resistant as defined by ANSI/ISEA 107 Section 10.5."

ASTM standards.ieee.org

ASTM F1506

The American Society for Testing and Materials (ASTM) international specification outlines the minimum design characteristics and performance requirements for occupational apparel worn by electric utility line workers and others exposed to momentary electric arc flash and related thermal hazards, such as exposure to open flame and radiant heat.

CAT RATINGS

Category (CAT) requirement is a rating assigned to dual-hazard FR workwear that indicates the level of protection a garment provides wearers against injury in the event of an arc flash. CAT 0 represents the lowest level of rated protection while CAT 4 represents the highest level of rated protection. Most of Wrangler's FR workwear falls within CAT 2 based on arc thermal protective value (ATPV) ratings.

NESC standards.ieee.org

National Electrical Safety Code

The National Electrical Safety Code® (NESC) provides guidance on safeguarding employees installing, operating, and maintaining electric power and communication utility systems that supply residential, commercial, and industrial buildings. This standard protects workers from arc flash exposure by requiring employers to perform hazard risk analyses for employees that work on or near energized parts or equipment. If the incident energy is greater than 2 cal/cm², Arc Rated (AR) PPE is required.

NFPA 2112 nfpa.org/2112

2112

A National Fire Protection Association (NFPA) standard on FR clothing to help protect industrial personnel against short-duration thermal exposures from fire. Essential for manufacturers and certifying agencies, this standard specifies performance requirements and test methods for FR fabrics and garments to better prevent flash fire exposure and injury.

NFPA 2113 nfpa.org/2113

A National Fire Protection Association (NFPA) standard on the proper selection, care, use, and maintenance requirements of FR garments to help protect industrial personnel against short-duration thermal exposures from fire. Developed primarily for garment end users to reduce health and safety risks, as well as contamination and damage of FR garments. This standard specifies the selection, care, use, and maintenance requirements for such garments that are compliant with NFPA® 2112: Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire.

NFPA 70E nfpa.org/70e

Standard for Electrical Safety in the Workplace®.

Originally developed at OSHA's request, NFPA 70E® states requirements for safe work practices to protect personnel by minimizing exposure to major electrical hazards. NFPA 70E also assists companies and employees in avoiding potential workplace injuries and fatalities due to shock, electrocution, arc flash, or arc blast, as well as complying with OSHA 1910 Subpart S and OSHA 1926 Subpart K.

OSHA osha.gov

OSHA 29 CFR 1910.26

This section of the Occupational Safety and Health Administration's (OSHA) 29 CFR 1910.269 covers the operation and maintenance of electric power generation, control, transformation, transmission, distribution lines, and equipment.

UL® ulse.org

Underwriters' Laboratories® (UL) develops safety-related certification, validation, testing, inspection, auditing, advising, and training services to a wide range of clients, including manufacturers, policymakers, regulators, retailers, service companies, and consumers. Wrangler® utilizes UL Solutions to ensure compliance with the NFPA 2112 standard.

Product Warranty

Every Wrangler® product carries a one-year warranty, which covers actual defects in materials or workmanship. Consumer satisfaction is a key element in the successful marketing of Wrangler® merchandise at retail.

Return Goods Policy

Only authorized returns will be accepted by our shipping locations. In the event you find it necessary to request permission to return goods, authorization must be obtained from:

Product Warranty

P.O. Box 21488

Greensboro, North Carolina 27420

- Request for return goods must be made within 30 days from date of shipment.
- Authorization for return will not be made on merchandise shipped more than 30 days prior to the request for return.
- Correspondence pertaining to return goods should furnish the invoice number, reason for request for return, and other sufficient information so that immediate consideration can be given for use on the returned merchandise. Only returns with this label will be accepted at our shipping locations.
- Any merchandise returned after proper authorization must be received at our plants in at least as good condition as when originally shipped. Our receiving plants will have the authority to judge on this matter and to recommend adjustments in credits if such be deemed appropriate. Defectives from Retail Account should be shipped to:

Distribution Center

12173 Rojas Drive, P.O. Box 909

El Paso, TX, 79936

- Small parcel post returns of defective merchandise from consumers are excepted from this policy and may be sent without authorization to:

Wrangler® Quality Control Department

 1421 South Elm/Eugene Street,
 Greensboro, North Carolina 27406

- Your cooperation with this policy will be greatly appreciated and will help us provide prompt and efficient service.
Our hours of operation are Monday–Friday 8 am to 5 pm EST
